

ARYBHATT

Pratapgarh, Uttar Pradesh, 230501

☎ +91 9517471194 ✉ bhattarya4533@gmail.com [in linkedin.com/in/bhattarya4533](https://www.linkedin.com/in/bhattarya4533) github.com/arybhatt4533

Technical Skills

Languages: C++ (DSA), Python (basic), JavaScript, HTML/CSS, SQL

Frameworks/DB: React.js, Node.js, PostgreSQL, RESTful APIs

Developer Tools: Git/GitHub, Docker, Kali Linux, VS Code, pgAdmin 4, Google Cloud

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Experience

Open Source Developer

Dec. 2025 – Present

Multi-Org Contributor

Remote

- Contributing to global open-source organizations including Open Food Facts, Kiwix, and JDE Robotics, focusing on backend optimization and UI enhancements.
- Refactored RESTful APIs and improved system performance by 20% through efficient code maintainability practices.
- Collaborating with international maintainers using Git/GitHub workflows to resolve critical bugs in professional-grade software.

Tenacious Hub Pvt Ltd

Oct. 2025 – Nov. 2025

AI Development Workshop Student Intern

Noida, UP (Remote)

- Gained a foundational understanding of Artificial Intelligence architecture and how machine learning models process real-world data.
- Explored AI workflows, including data preprocessing and the logic behind predictive analytics in modern software applications.
- Studied the integration of AI-driven features into full-stack web environments to enhance user experience.

Projects

Sentinel Vault | React, Node.js, PostgreSQL, Tailwind | [Link](#)

April 2026

- Architected a full-stack active defense system that traps malicious actors by simulating vulnerable endpoints (e.g., /.env, /admin).
- Implemented a Real-time Threat Dashboard using React and Tailwind CSS to visualize incoming attack vectors and IP metadata.
- Designed a robust PostgreSQL schema to log high-fidelity threat intelligence, capturing IP address, payload, and timestamps.

STDAMS Satellite Threat Detection System | Python | [Link](#)

Feb. 2026

- Developed an advanced monitoring system designed for Satellite Telemetry & Abnormal Activity Detection using simulated datasets.
- Implemented pattern recognition algorithms to identify potential orbital threats and unauthorized signal interference.
- Logic recognized at UHack 4.0 National Hackathon, securing a Certificate of Merit for technical innovation.

AI Interview Prep Web Platform | Web, Gemini Speech API, NLP | [Link](#)

Jan. 2026

- Engineered an AI-driven platform where users can upload resumes and skills to conduct Mock Technical Interviews in English.
- Integrated an automated rating system that analyzes user responses and provides detailed feedback on technical accuracy and communication.
- Utilized Speech-to-Text and NLP techniques to simulate a real-world interview environment for career preparation.

Achievements & Certifications

Deloitte Australia (Forage): Data Analytics Job Simulation – Created Tableau dashboards and used Excel for forensic analysis (Jun. 2026). Class: XXrsYHzRR7vWvd3Cj

CodeAlpha: Full Stack Developer Certification – Developed projects using the PERN stack (Nov. 2025). ID: CA/SE1/8237

Simplilearn & Google: Artificial Intelligence (AI) Certification – Foundation of AI and core ML workflows (Dec. 2025). ID: 9617899

UHack 4.0 National Hackathon: Certificate of Merit for Active Security Defense Prototype (Feb. 2026).

LeetCode Programming: Solved 200+ problems in C++ with a strong focus on Graph/DP (Ongoing).

Education

Prof. Rajendra Singh (Rajju Bhaiya) University

Sep. 2024 – Present

Bachelor of Computer Applications (BCA)

Prayagraj, UP
