Education

Prof. Rajendra Singh (Rajju Bhaiya) University — Prayagraj, UP

Sep. 2024 – present

Bachelor of Computer Applications (BCA)

Uttar Pradesh

Experience

Open Source Developer

Dec 2025 – Present

Multi-Org Contributor (GSoC 2026 Aspirant)

Remote

- Actively contributing to global open-source organizations including **Open Food Facts** (12 PRs, 3 Merged), **Kiwix**, **INCF**, and **JDE Robotics**.
- Refactoring backend logic and optimizing RESTful APIs to improve system performance and ensure code maintainability across diverse codebases.
- Collaborating with international maintainers to identify critical bugs and implement UI/UX enhancements in professional-grade software.
- Engaging in community code reviews and technical documentation to support global software scalability and contributor onboarding.
- Utilizing Git and GitHub workflows for seamless version control and collaboration in a globally distributed team environment.

AI Development Workshop

Oct 2025 – Nov 2025

Tenacious Hub Pvt Ltd

Noida, UP (Remote)

- Completed an intensive 1-month workshop focused on Artificial Intelligence fundamentals, covering Neural Networks and Data Modeling techniques.
- Developed Python scripts for automated data analysis and implemented pattern recognition algorithms on real-world datasets.
- Explored the integration of AI-driven insights into modern full-stack web architectures for predictive data analytics.

Projects

Gym Reservation Bot | *Python, Selenium, Google Cloud Console*

January 2021

- Developed an automatic bot using Python and Google Cloud Console to register myself for a timeslot at my school gym.
- Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- Created a Linux virtual machine to run on Google Cloud so that the program is able to run everyday from the cloud.
- Used Cron to schedule the program to execute automatically at 11 AM every morning so a reservation is made for me.

Ticket Price Calculator App | *Java, Android Studio*

November 2020

- Created an Android application using Java and Android Studio to calculate ticket prices for trips to museums in NYC.
- Processed user inputted information in the back-end of the app to return a subtotal price based on the tickets selected.
- Utilized the layout editor to create a UI for the application in order to allow different scenes to interact with each other.

Transaction Management GUI | *Java, Eclipse, JavaFX*

October 2020

- Designed a sample banking transaction system using Java to simulate the common functions of using a bank account.
- Used JavaFX to create a GUI that supports actions such as creating an account, deposit, withdraw, list all accounts, etc.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Technical Skills

Languages: C++ (Strong DSA), JavaScript (ES6+), Python, HTML5, CSS3, SQL (MySQL)

MERN Stack: MongoDB, Express.js, React.js, Node.js, RESTful API Development

Developer Tools: Git/GitHub, Docker, Kubernetes, AWS, Kali Linux, VS Code

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Achievements & Certifications

- UHack 4.0 National Hackathon** | Certificate of Merit for 24hr prototype.
- Computer Fundamentals Quiz** | Top 10 Ranker & Trophy Winner (College Level).
- LeetCode Programming** | Solved 200+ problems in C++ (Strong DSA focus).
